ITEM 1 – THE COMPANY

1.1 INCORPORATION

Saputo Inc. was constituted by a Certificate of Amalgamation issued pursuant to the provisions of the *Canada Business Corporations Act* on July 1, 1992, which was amended on August 25, 1997 in order to change the provisions attached to its authorized share capital. On August 2, 2000, the Certificate was further amended to enable the directors to appoint additional directors between shareholders' meetings. The head office and principal place of business of the Company is located at 6869 Métropolitain Boulevard East, Saint-Léonard, Québec, H1P 1X8.

In this Annual Information Form, unless the context otherwise requires or indicates, the terms “Saputo” and the “Company” mean Saputo Inc. itself or together with its subsidiaries and/or other entities under its direct or indirect control (collectively the “**Subsidiaries**”), or any one or more of them.

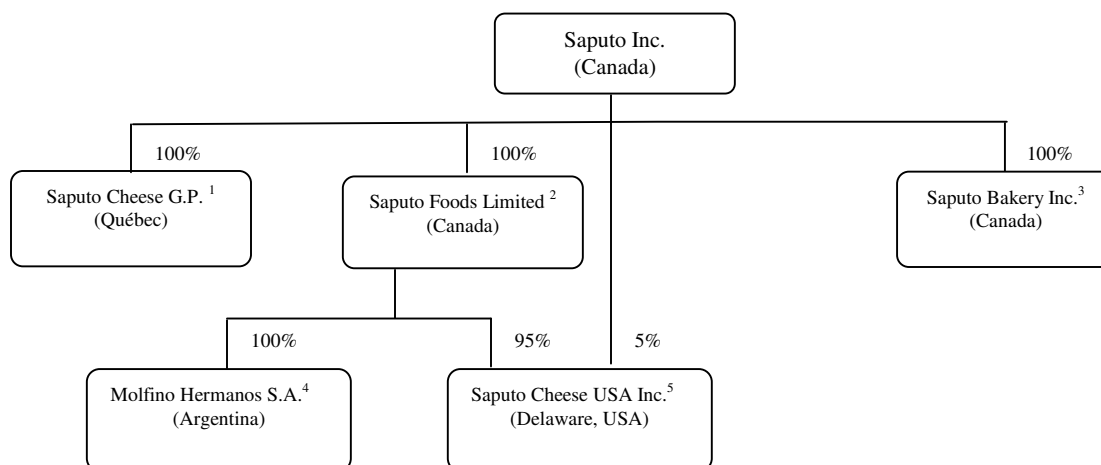

On November 23, 2001, Saputo declared a 100% stock dividend on the Common Shares which had the same effect as a two-for-one split (the “**Stock Split**”) and doubled the number of Common Shares outstanding. All references to numbers of Common Shares and prices of Common Shares made herein have been adjusted to reflect the Stock Split.

In this Annual Information Form, all references to “\$” or “CDN\$” are to Canadian dollars and all references to “US\$” are to United States dollars.

In this Annual Information Form, the information is being presented as of May 28, 2007, except for financial information and percentages derived therefrom which are given for the fiscal year ended March 31, 2007, and for the information relating to employees which is presented as of May 1, 2007. The acquisition of the activities related to Land O'Lakes West Coast industrial cheese business (the “**Land O'Lakes West Coast Acquisition**”) (see “History (including Acquisitions and Dispositions)”) is reflected in the number of employees and facilities but is not included in any financial information because the acquisition was completed on April 2, 2007.

1.2 CORPORATE STRUCTURE

The following organizational chart illustrates the corporate structure of Saputo and its significant Subsidiaries, and their respective jurisdictions of incorporation as at May 28, 2007.

- (1) Production, sale and distribution of dairy products, namely cheese, a wide range of fluid milk, cream products, sour cream, cottage cheese, yogurt, soft serve dairy mixes as well as juices and other beverages and other food products in the Province of Québec.
- (2) Production, sale and distribution of dairy products, namely cheese, a wide range of fluid milk, cream products, sour cream, cottage cheese, yogurt, soft serve dairy mixes as well as juices and other beverages and other food products in Canadian provinces other than Québec.

- (3) Production, sale and distribution of bakery items mainly in Canada.
- (4) Production, sale and distribution of dairy products in and from Argentina.
- (5) Production and sale of dairy products, mainly cheese, in the United States.

ITEM 2 – GENERAL DEVELOPMENT OF THE BUSINESS

2.1 OVERVIEW

The Company operates its business through two sectors and six divisions, the Dairy Products Sector composed of the Canadian and Other Dairy Products Sector and the US Dairy Products Sector, and the Grocery Products Sector. The Dairy Products Sectors and the Grocery Products Sector represent respectively 95.7% and 4.3% of the Company's total sales. The Canadian and Other Dairy Products Sector is composed of the Dairy Products Division (Canada), the Dairy Products Division (Argentina), the Dairy Products Division (Germany) and the Dairy Products Division (United Kingdom); the US Dairy Products Sector is composed of the Cheese Division (USA); and the Grocery Products Sector is composed of the Bakery Division.

The Company's total consolidated sales are made of 68.4% in Canada, 25.9% in the United States and 5.7% in Argentina and Europe. The Company completed the acquisition of the activities of Dansco Dairy Products Limited (the "**Dansco Acquisition**") (See "History (including Acquisitions and Dispositions)") in the United Kingdom on March 23, 2007 and the Land O'Lakes West Coast Acquisition in the United States on April 2, 2007. With the Land O'Lakes West Coast Acquisition, the Company's total consolidated sales, on a pro-forma basis, will be made 60% in Canada, 35% in the United States, and 5% in Argentina and Europe. The Company operates 47 manufacturing facilities and employs approximately 9,100 employees.

Canadian and Other Dairy Products Sector

Through its Canadian and Other Dairy Products Sector, Saputo produces and markets, in Canada, mozzarella, cheddar, as well as other specialty and fine cheeses, butter, powdered milk and evaporated milk, as well as value-added by-products such as whey powder, ice cream mixes, lactose and whey protein. Saputo also distributes fine imported cheeses to specialty stores. Through its distribution network, it also offers non-dairy products manufactured by third parties. Saputo has established itself as Canada's leading producer of cheese, with a share of approximately 37% of the Canadian natural cheese production. Saputo's cheese products are sold through independent non-exclusive distributors and sales agents as well as through its own distribution network within three market segments: retail, foodservice and industrial.

In Canada, the Company also produces, markets and distributes fluid milk and a wide range of dairy products, including cream, yogurt, sour cream and cottage cheese. The dairy product line is complemented by various non-dairy products, including flavoured coffee creamers, juices and drinks. The Company is one of the three largest fresh milk processors in Canada with an estimated 22% share of the Canadian market. Saputo sells these products mainly to the retail segment through its direct-store delivery ("**DSD**") distribution network operated by Company-owned and independent distributors, as well as through an important home delivery network. These products are also sold to the foodservice segment.

Through its operations in Argentina, the Company produces and markets a wide variety of soft, semi-soft, hard and grated cheeses, as well as butter, cream, milk powder, UHT milk, *dulce de leche* (caramelized milk) and dairy ingredients. Saputo sells these products to the retail and industrial market segments through independent distributors. The Company is the third largest dairy processor in Argentina.

Through its operations in Germany, acquired on April 13, 2006, the Company produces and markets Italian cheese specialties such as mozzarella, ricotta and mascarpone. Saputo sells these products mainly to the retail and industrial market segments.

Through its operations in the United Kingdom, acquired on March 23, 2007, the Company produces and markets mainly mozzarella. Saputo sells this product to the foodservice market segment.

During fiscal 2007, the retail segment accounted for 61.9% of the Canadian and Other Dairy Products Sector's sales, the foodservice segment for 29.2%, and the industrial segment for 8.9%.

In fiscal 2007, the sales from the Canadian and Other Dairy Products Sector represented 69.8% of the Company's total sales. Through this Sector, the Company operates 25 manufacturing facilities in Canada, two in Argentina, one in Germany and one in the United Kingdom, and employed, as of May 1, 2007, 5,546 employees, 879 of which were located in Argentina, 71 in Germany and 128 in the United Kingdom.

US Dairy Products Sector

Through its US Dairy Products Sector, the Company produces a broad line of mozzarella and specialty cheeses. The Company also produces sweetened condensed milk as well as whey protein concentrates and ingredient blends which are derived from its cheese production. Included with the Land O'Lakes West Coast Acquisition is a by-product drying facility, which will provide greater flexibility in our operations in the United States.

Saputo ranks as one of the top five natural cheese producers in the United States with approximately 5% of natural cheese production. Directly or through independent non-exclusive distributors and sales agents, Saputo services three market segments: retail, foodservice and industrial. During fiscal 2007, the retail segment accounted for 31% of the US Dairy Products Sector's sales volume, the foodservice segment for 48% and the industrial segment for 21%. With the Land O'Lakes West Coast Acquisition, the US Dairy Products Sector's sales volume, on a pro-forma basis, will be 25% in the retail segment, 45% in the foodservice segment and 30% in the industrial segment.

In fiscal 2007, the US Dairy Products Sector represented 25.9% of the Company's total sales. Through this Sector, the Company operates 15 manufacturing facilities in the United States and employed, as of May 1, 2007, 2,378 employees.

Grocery Products Sector

The Company produces, markets and distributes snack-cakes, tarts, cereal bars, fresh cookies and fresh tarts in Canada. These products are sold almost exclusively in the retail market through a DSD distribution network as well as independent distributors. Saputo is the largest manufacturer of snack-cakes in Canada. It also manufactures, on a small scale, products for the US market pursuant to agreements whereby the Company manufactures products for third parties under brand names owned by such parties (the "**Co-Packing Agreements**"). In this Sector, the Company operates three (3) manufacturing facilities in the Province of Québec and employed, as of May 1, 2007, 1,178 employees.

2.2 HISTORY (INCLUDING ACQUISITIONS AND DISPOSITIONS)

Mr. Emanuele (Lino) Saputo, Chairman of the Board of Saputo, founded the Company with his parents in 1954, producing quality cheeses for the Italian community of Montréal.

Unless otherwise specified in this section, the acquisitions completed by Saputo, which are listed below, were done on a debt-free basis.

Between 1970 and 1997, Saputo acquired several production operations, food distributors and developed its national distribution network, positioning itself in Canada as a leading producer of mozzarella. In 1988, the Company entered the United States market by acquiring two cheese manufacturing plants. On July 31, 1997, Saputo acquired Crémierie des Trois-Rivières, Limitée thereby entering the fluid milk market.

On October 15, 1997, the Company completed its initial public offering of 18,941,000¹ Common Shares at \$8.50¹ per share (the “**Initial Public Offering**”). In December of the same year, Saputo issued 18,000,000¹ special warrants at \$12.50¹ per warrant in order to finance, in part, the Stella Acquisition (as defined below).

On December 5, 1997, Saputo expanded its presence in the United States by acquiring Stella Holdings, Inc., a manufacturer of mozzarella and specialty cheeses (which, together with its then wholly-owned subsidiaries, are hereinafter collectively referred to as “**Stella**”) for a total consideration of approximately \$580 million paid in cash (the “**Stella Acquisition**”). During its fiscal year ended December 31, 1996, Stella had revenues of approximately \$1 billion. With the Stella Acquisition, the Company tripled its revenues and established itself as one of the leading natural cheese producers in the United States.

In 1998, Saputo continued its growth in Canada and the United States by acquiring mozzarella, specialty cheeses, sweetened condensed milk and value-added by-products manufacturers.

On September 15, 1999, the Company acquired all of the outstanding shares of Culinar Inc., now known as Saputo Bakery Group Inc., for a price of \$283.5 million. This transaction was paid in cash and through the issuance of 5,006,000¹ Common Shares of Saputo at a price of \$19.98¹ per share. Culinar produced, marketed and distributed snack-cakes, cookies, fine breads and soups and had sales of approximately \$270 million. With this acquisition, Saputo became the largest manufacturer of snack-cakes in Canada.

On November 12, 1999, Saputo completed the private placement of US \$250 million Senior Notes to institutional investors in the United States. The term of the Notes ranges from seven to fifteen years with an average interest rate of 8.16%. The proceeds of the private placement were used to refinance part of the Company’s existing credit facilities.

On February 28, 2000, the Company acquired all of the outstanding shares of Groupe Cayer-JCB Inc., a manufacturer of fine cheeses based in the Province of Québec, for a price of \$13.7 million paid in cash and \$6.7 million of indebtedness. Cayer had sales of approximately \$55 million.

On February 5, 2001, Saputo completed the acquisition of the fluid milk and cheese operations of Agrifoods International Co-operative Limited (“**Agrifoods**”), one of the largest dairy processors in Canada, through the purchase of all of the outstanding shares of some of Agrifoods’ operating subsidiaries including Dairyland Fluid Division Ltd, Armstrong Cheese Company Ltd and Baxter Foods Limited for the price of \$407.3 million paid in cash. The acquired businesses generated net sales of approximately \$1.4 billion.

On July 15, 2001, Saputo concluded a partnership agreement pursuant to which Dare Foods Limited (“**Dare**”) acquired the cookies, fine breads and soup operations of Saputo’s Grocery Products Sector which represented annual revenues of approximately \$83 million. In consideration thereof, Saputo obtained a 21% equity interest in the Dare group. As a result of this transaction, Dare became the second largest cookie producer in Canada.

On November 23, 2001, Saputo completed its Stock Split and doubled the number of Common Shares outstanding. See “The Company – Incorporation”.

On May 23, 2003, the Company acquired the business relating to the *Treasure Cave* and *Nauvoo* blue cheese brands and certain blue cheese-related assets from ConAgra Foods Inc. for a purchase price of \$36.5 million paid in cash. This acquisition positioned the Company as the leader in the blue cheese category on the US retail market segment.

On November 28, 2003, Saputo acquired 100% of Molfino Hermanos S.A., the third largest dairy processor in Argentina, for the price of approximately \$60 million paid in cash. This company produces and

¹ This information has been restated to reflect the Stock Split.

markets a wide variety of soft, semi-soft, hard and grated cheeses, as well as butter, cream, milk powder, UHT milk, *dulce de leche* (caramelized milk) and dairy ingredients. This transaction gave Saputo the opportunity to establish itself in a market where the raw material is accessible at competitive international prices.

On April 18, 2005, Saputo acquired the activities of Fromage Côté S.A. and Distributions Kingsey Inc., a manufacturer of pressed cheddar and cheddar cheese curd, Swiss-type cheese and other specialty cheeses for a purchase price of \$53.4 million paid in cash.

On May 27, 2005, Saputo acquired the activities of Schneider Cheese, Inc., a manufacturer and seller of string cheeses and cheese sticks, for a purchase price of \$32.9 million paid in cash.

On April 13, 2006, Saputo acquired the activities of Spezialitäten-Käserei De Lucia GmbH (“**De Lucia**”), a German manufacturer and seller of Italian cheese specialties such as mozzarella, ricotta and mascarpone, for a purchase price of \$7.1 million paid in cash. With this acquisition, the Company made its entry into the European market.

On July 28, 2006, Saputo acquired the activities of Boulangerie Rondeau Inc. and Biscuits Rondeau Inc., which manufacture, commercialize and distribute fresh tarts and fresh cookies, for a purchase price of \$12.5 million paid in cash (the “**Rondeau Acquisition**”).

On March 23, 2007, Saputo completed the Dansco Acquisition for a purchase price of \$12.2 million paid in cash. This acquisition complements Saputo’s current activities in the European market and is in line with its objective of growing its global presence.

On April 2, 2007, Saputo completed the Land O’Lakes West Coast Acquisition for a purchase price of \$254 million paid in cash. Land O’Lakes is a national US farmer-owned food and agricultural cooperative. In connection with this transaction, Saputo secured a long term milk supply agreement pursuant to which Land O’Lakes will supply to the Company over 2 billion pounds of milk annually. With the Land O’Lakes West Coast Acquisition, Saputo Cheese Division (USA) grows significantly in size, establishing a better balancing capability throughout the United States.

ITEM 3 – INDUSTRY OVERVIEW

3.1 DAIRY PRODUCTS INDUSTRY

3.1.1 The Canadian Dairy Industry

Regulatory Environment

The regulation of the content, composition, labelling, packaging, marketing and distribution of all food products in Canada is a shared responsibility between the federal and the provincial governments. The dairy industry is further governed by a series of federal and provincial regulations specific to the production, processing and distribution of milk and milk-related products. All applicable statutes, whether provincial or federal, allow for plant inspections, product testing and other regulatory scrutiny.

In Canada, provincial legislation demands that all milk processing plants, including those who only ship to local markets, be licensed, compelling them to comply with all provincial inspections and regulations. In addition, all milk processing plants that ship products into inter-provincial or international trade are subjected to regular inspections by federal authorities and are required to be registered under the *Canada Agricultural Products Act*.

Milk Supply

The Canadian dairy industry operates within a highly regulated environment. The Canadian Dairy Commission (“**CDC**”), a crown corporation, has been mandated by the federal government to implement Canada’s national dairy policy which is predicated on shared jurisdictional powers between the federal and provincial

governments. Fluid milk is regulated provincially, while industrial milk is regulated federally. “Fluid milk” refers to table milk or cream intended for consumption in fluid forms, whereas “industrial milk” is used for the manufacturing of all other dairy products, such as cheese, butter, ice cream and yogurt. According to CDC information, the fluid milk sector represents approximately 38% of raw milk delivered in Canada while the industrial milk sector represents approximately 62% of such deliveries. Total milk production in Canada approximates 75 million hectolitres per year.

The Canadian dairy industry operates within a supply managed system. The key goal of supply management is to ensure a fair return for dairy farmers while maintaining the production of sufficient volumes of industrial milk to satisfy the domestic Canadian consumer demand for dairy products. This is essentially achieved by setting the support price that the dairy processors can receive for butter and skimmed milk powder sold to the CDC to clear market surpluses and by controlling the supply of industrial milk.

Every dairy year (which runs from August 1 to July 31), the CDC calculates the national industrial milk production level based on anticipated domestic demand. This amount is then allocated according to the terms of the National Milk Marketing Plan, a federal/provincial agreement. This agreement stipulates, among other things, that Québec’s and Ontario’s shares of the national industrial milk production (the “**Market Sharing Quota**”) are approximately 46.5% and 31.2%, respectively.

Once the industrial milk level is determined and allocated among the provinces, provincial marketing boards govern the production, pricing and marketing of milk within their own borders. Each provincial marketing board allocates the milk to dairy processors. Industrial milk is allocated according to a cascading system that classifies industrial milk into various classes of products to be manufactured. Priority of supply is given to the higher milk classes, which command a higher milk price.

Although there may be some provincial variations, quantities of milk in each class, other than fluid milk, are generally restricted in their growth. Since the Market Sharing Quota is based on historical and anticipated demand for dairy products, Management believes that the risk of a processor losing a significant part of its available milk volume is low.

International Trade (Canada)

Imports. The Department of Foreign Affairs and International Trade administers Canada’s cheese import quotas. These quotas are divided into European Union and non-European Union sources. This results from Canada’s obligation to the European Union to import from it 66.0% of the approximately 20.4 million kilograms of cheese that Canada is committed to import annually under the World Trade Organization (“**WTO**”) Agreement on Agriculture. Imports within this minimum access commitment of 20.4 million kilograms of cheese are subject to low rates of duty while imports over this commitment are subject to significantly higher tariffs. Over-access tariffs for cheese currently stand at 245.5% of invoiced value. On May 1, 2004, the European Union expanded with the addition of ten (10) new countries. At this time, these new additions did not alter the current import ratios defined above and applicable to Canada.

Exports. In order to comply with the final decision of the WTO rendered in December 2002, which found that Canada’s dairy export practices constituted export subsidies, Canada is forced to export any quantity of milk products over its WTO commitments at prices based on Canada’s national raw milk prices which makes exports of dairy products from Canada non-competitive. The WTO decision does not deal with dairy by-products such as lactose and whey.

Canadian Market

The dairy processing industry makes a major contribution to the Canadian economy with shipments valued at \$11.5 billion in 2005. The dairy processing sector accounted for approximately 16% of the estimated value of all food and beverage processing sales during the same year. Significant rationalization is occurring in the processing sector as processors strive to achieve the greater efficiencies and economies of scale required to remain competitive with alternative products.

In 2005-2006, there were 15,552 dairy farms in Canada. This represents a decrease of 672 farms from the previous dairy year. Approximately 81% of Canada’s dairy operations are located in the Provinces of Québec and Ontario. The Western provinces and the Maritime provinces account for 13% and 6%, respectively.

The following table indicates the production volumes of selected dairy products manufactured in Canada in 2006.

Canadian Production Volumes of Selected Dairy Products in 2006 ⁽¹⁾
(in thousands)

Natural cheese.....	334,696	kg
Fluid milk and cream	3,008,971	litres
Cottage cheese	27,846	kg
Ice cream and other frozen products.....	504,293	litres
Other dairy products	466,870	kg

(1) Source: Canadian Dairy Commission.

3.1.2 The United States Dairy Industry

Regulatory Environment

In the United States, the production of all food products is subject to extensive federal, state and local government regulations regarding the advertising, quality, packaging, labelling and safety.

All food plants are subject to regulation and inspection by the United States Food and Drug Administration (“**FDA**”) and by the United States Department of Agriculture (“**USDA**”). Individual states may also enforce more stringent regulations regarding the manufacturing of food products. State and local government agencies work with the federal government to ensure the safety of food produced within their jurisdictions. Violations of federal, state and local regulations may result in seizure and condemnation of products, cease and desist orders, injunctions and monetary penalties. State and local government agencies also enforce environmental compliance.

Milk Supply

In the United States, there are two grades of milk: Grade A and Grade B. Grade A milk is produced under specific sanitary requirements and dairy producers must hold a Grade A shipping permit. Grade A milk accounts for 99% of the United States milk supply and is used for fluid as well as for the manufacturing of various dairy products including cheese. Grade B milk, which is not used for fluid milk, represents 1% of the United States milk production and is used exclusively to manufacture butter, cheese and skim milk powder. Total milk production in the United States approximates 825 million hectolitres per year.

The following table presents the utilization of the United States milk production in 2006:

Utilization of United States Milk Production in 2006 ⁽¹⁾

Utilized as fluid milk and cream	29 %
Manufactured into natural cheese.....	21 %
Manufactured into frozen dairy products.....	4 %
Manufactured into butter.....	5 %
Used on farms where produced.....	1 %
Other uses.....	40 %

(1) Source: USDA, Dairy Products 2006 Summary, published April 2007. Calculated from Total Solids.

In most cases, milk marketed within the United States is priced according to its use. Milk prices are set monthly based on product price formulas. Price data used in the formulas is collected through surveys conducted by the USDA’s National Agriculture Statistics Service. Milk used in fluid products is placed in Class I, the highest priced class. Milk used to produce ice cream, yogurt, cottage cheese, sour cream, ricotta cheese and other soft products is Class II. Milk used to manufacture cheese and cream cheese is Class III, and milk used to produce butter and milk powders is Class IV. In California, milk used to produce ice cream and sherbet is Class III; milk used to manufacture butter and milk powder is Class 4(a) and milk used to produce cheese and cream cheese is Class 4(b). USDA conducted hearings commencing in January 2006 to consider a petition for the revision of manufacturers’ make-allowances for products included in Class III and Class IV milk price formulas. The then current make allowances were based on manufacturing cost surveys dating back to 1999 and 2000. As a result of those hearings, USDA implemented an interim decision amounting to a reduction in the Class III price of approximately US\$0.25 per hundred weight effective February 1, 2007. The USDA final decision is still pending. The State of California Department of Food and Agriculture held a hearing in June 2006 to consider a similar petition and decided to implement a change in the make allowance which resulted in a reduction of the Company’s California milk cost of approximately US\$0.42 per hundred weight as of November 1, 2006.

Wholesale pricing for the bulk of the United States cheese production is established by daily cash cheddar cheese trading on the Chicago Mercantile Exchange (CME). The last trade of the day establishes the market price for the day. If no trades occur, the market price is determined based on the bid and offer prices. Processors typically charge a premium over the CME price.

A dairy processing plant is not limited in terms of the quantity of milk it can receive and is free to negotiate its milk supply with whomever it chooses. Independent processors usually negotiate with local cooperatives or may procure milk directly from individual farms. Processors are charged a price which reflects the current month’s USDA class price plus a negotiated handling charge.

United States dairy programs influence the production and marketing of milk and milk products through the operation of the Commodity Credit Corporation (“CCC”), a federal agency. CCC buys butter, non-fat dry milk and cheese at the following support prices:

- Butter @ US \$1.0500 per pound;
- Cheddar cheese 40 pound blocks @ US \$1.1314 per pound;
- Non-fat dry milk powder non-fortified @ US \$0.800 per pound.

Such products are sold or used either domestically or internationally in specific government programs. The CCC does not directly support dairy farmers, nor does it establish a target return for farmers.

International Trade (United States)

Imports. Another key component of the United States dairy program is import restrictions. Most United States cheese import quotas are country and product specific. Under the terms of the WTO Agreement on Agriculture, the United States agreed to import, at a lower tariff rate, approximately 135,586 metric tons of cheese in 2006. Tariffs for cheese in excess of the quota are prohibitive.

Entry for dairy products made with sheep, goat and buffalo milk do not require a license nor are they subject to a United States duty. The same is true for a few other products including brie cheese.

Exports. The United States is not a significant exporter of dairy products. Its export activity accounted for US \$1.886 billion in 2006 and US \$1.625 billion in 2005.

Most export activity is conducted through the Dairy Export Incentive Program which allocates subsidized export volumes to specific countries thereby enabling exporters to bid for export assistance for dairy products destined to these countries.

United States Market

The USDA states that there were 409 cheese manufacturing plants in the United States in 2006, which produced 4.3 billion kilograms (kg) of cheese. Cheddar accounted for 32.8% of this amount, or 1.4 billion kg, while Italian cheeses totalled 1.8 billion kg, or 41.8%. Mozzarella alone added up to 1.4 billion kg, representing 78.8% of Italian cheeses and 33% of all cheeses produced in 2006.

3.1.3 International Dairy Industry

Compared to world dairy production, the volumes of dairy products currently traded on the world market are small. However, we note that the trade of dairy products tends to grow and that the countries' respective market shares are evolving very quickly. The bulk of this international trade is regional within each continent and is energized by free-trade zones, the oldest and the biggest being the European Union (the "EU"). Other trade zones are developing in the Americas, the Middle East and in Asia.

In recent years, the shifts in market shares have been significant. In fact, the WTO Uruguay Round of trade negotiations influenced this change as the WTO addressed specifically for the first time the trade of agricultural products. Between 1995 and 2002, the EU (then comprised of 15 countries) has seen its share of the world market shrink from 53% to 30%, New Zealand's share grow from 19% to 28%, Australia's share grow from 13% to 18%. The United States share has fallen from 6% to 4% while Argentina has gained 1% to reach 4% of the world market. Following the WTO Appellate Body's ruling rendered in December 2002, Canada exports small quantities of dairy products in accordance with WTO limits.

The implementation of the latest *Common Agricultural Policy* in the expanded EU is expected to have an impact on the global dairy industry. This policy aims to reduce dairy farm gate prices as well as eliminate export subsidies, with the farm revenue loss being compensated for by direct farm payments consistent with WTO commitments. Reports indicate that such compensation may be inadequate to prevent a significant drop in dairy farm numbers across Europe, which may contribute to maintaining firmer prices in the international market. The world market is itself polarizing into "pre-packed, consumer ready" and "bulk commodity, dairy ingredients" markets with as yet unpredictable long term effects on traditional trading patterns and ultimately, world prices.

Argentina

Regulatory Environment

The regulatory environment in Argentina is diametrically different from that in Canada or the United States. While there are national, provincial and municipal laws, only a very small number are specific to the dairy

industry. The dairy industry adheres to the international Codex Alimentarius standards for those products which are traded internationally, such as cheese and milk powder, and follows recognized good manufacturing practices for all products brought to the domestic market.

Milk Supply

In Argentina, milk prices are negotiated monthly between the processors and milk producers. There are no limitations or restrictions as to the quantity of milk that is produced and processed. In addition, milk marketed within Argentina is not priced or classified according to its use. Moreover, dairy processors are not limited to the amount of milk that they can purchase and are free to negotiate milk supply agreements with whomever they choose. Usually, agreements are negotiated with dairy producers within a given radius of the dairy processing plant.

Total milk production in Argentina approximates 101 million hectolitres per year. The following table indicates the production volume of selected dairy products produced in Argentina.

Argentina Production Volumes of Selected Dairy Products in 2005 ⁽¹⁾
(in thousands)

Natural cheese.....	414	Metric tons
Fluid milk.....	1,598,559	Litres
Yogurt.....	405	Metric tons
Other dairy products	542	Metric tons

Exports

Argentina is a member of the South American free trade group Mercosur, and is also an active participant in the international dairy market. It has a large milk basin and is capable of producing milk at internationally competitive prices. There are no governmental programs that aid processors to export dairy products. In 2006, Argentina exported 360,550 MT of dairy products. Of this quantity, 237,454 MT was milk powder, 58,199 MT cheese and the remaining 64,897 MT consisted of other dairy products.

European Union

Regulatory Environment

The EU, now encompassing 25 countries, has multiple food related legislation and supporting regulations. These regulations cover all aspects of the agri-food industry from farm production to food processing and distribution. All member states are required to implement and enforce the regulations as conditions of EU membership. Consequently, the EU regulatory regime is the umbrella under which all dairy food production, processing and distribution as well as imports and exports are governed within the EU. No member state may enact competing regulations which could constitute a barrier to internal trade within the EU, nor trade externally to the EU without meeting EU standards and their related obligations.

In light of the foregoing, the German and United Kingdom dairy industries operate under the general dairy provisions of the EU's *Common Agricultural Policy*. In accordance with this policy, milk production quotas should be eliminated by 2014 and milk prices will continue to be reduced, with partial compensation for farmers being provided through direct payments consistent with WTO commitments.

Within Germany and the United Kingdom, there are a series of regulations governing the processing of milk into dairy products with standards based on the international Codex Alimentarius in place for cheese and skim milk powder. While there are Federal, State, Lander and municipal regulations, the majority are not specific to the dairy industry but apply equally to all food processing establishments and require the application of recognized good manufacturing practices.

Milk Supply

In Germany and the United Kingdom, milk prices vary from State to State and are usually negotiated monthly between the processors and milk producers. Generally, farmers sell their milk to cooperatives, independent milk dealers or directly to processors. The bulk of the milk is generally sold to cooperatives who process milk for their own account and also re-sell milk to milk dealers or to other processors. Processors generally contract a major portion of their supply needs with a cooperative or a milk dealer, and rely on the seasonal spot market to complete their annual requirements, taking advantage of seasonal milk price changes.

Total milk production approximate 284 million hectolitres per year in Germany and 140 million hectolitres per year in the United Kingdom, which represent together about 30% of all European milk production. The following table indicates the production volume of selected dairy products produced in Germany and in the United Kingdom:

Germanic Production Volumes of Selected Dairy Products in 2005 ⁽¹⁾
(in thousands)

Natural cheese.....	1,930	Metric tons
Fluid milk.....	6,008,000	Litres
Fresh dairy Products	2,956	Metric tons
Other dairy products	1,844	Metric tons

Exports

The declining milk price trend in Germany is expected to improve the competitiveness of German products within the EU and other export markets. The overall export potential for Germany remains positive. The recent dispute with the EU on protected denominations of origin for cheese, and particularly the protection afforded the names Feta and Parmesan, are expected to have some impact on cheese trade because Germany is the biggest exporter and importer of cheese worldwide (EU trade included). In Germany, national cheese regulation considers Feta and Parmesan as generic terms and not as denominations of protected origin.

In the United Kingdom, milk production has been slowly decreasing due not only to weather related difficulties but also to consistently lower farmgate milk prices than in the rest of the EU. However, recent developments in the United Kingdom suggest that this situation may change which could potentially halt the decline in milk production. Notwithstanding the foregoing, the United Kingdom offers the potential for dairy products export growth, due mainly to a very competitive raw milk price and high quality milk supply.

3.1.4 Future Trends

In 2006, the world wide dairy industry suffered the impacts of sudden shifts in climatic conditions, which was reflected in the availability and prices of internationally traded dairy products and commodities. While not the sole cause, this situation led to unprecedented price increases for such products, including dairy ingredients. There is considerable speculation that a new pricing base is currently being established worldwide, at higher levels than in the past while supplies of certain dairy ingredients and products have been and are expected to remain short of demand for some time. Such conditions increase competitive pressure in the industry and may create opportunities.

The competitive environment within the industry is expected to force regional processors to either adapt, sell or merge with other industry participants. Well-capitalized industry consolidators will likely take advantage of this competitive environment to make strategic acquisitions. Over the coming years, the dairy industry will need to focus on creating innovative dairy products that match the changing nutritional needs of consumers.

Representatives of the various governments have initiated discussions through the Doha Round of WTO negotiations that should lead to new tariff and subsidy reductions in agricultural products during the coming years. The Doha Round is expected to be completed before calendar 2008, depending on the date on which the Committee's framework paper is finalized and approved.

3.2 GROCERY PRODUCTS INDUSTRY

Regulatory Environment

The regulation of the content, composition, labelling, packaging, marketing and distribution of all food products in Canada is a shared responsibility between the federal and the provincial governments. The grocery products industry is subject to stringent quality and labelling standards, including those of the *Food and Drugs Act* and of the *Consumer Packaging and Labelling Act*.

Canadian Retail Market

Over the recent years, Canada's retail market has changed with the increasing importance of non-supermarket channels of distribution such as mass merchandisers and warehouse clubs. This trend has resulted in significant consolidation within the grocery channel where four national chains controlled approximately 87% of all retail sales in 2006.

The snack-cake industry generates sales of approximately \$837 million per year in Canada. This industry segment comprises among others, snack-cakes, muffins, granola, cereal and fruit bars, fresh baked deserts business as well as marshmallow squares. Pre-packaged snack-cake products enjoy a 15% market share of the snack-cake industry in Canada. Of the pre-packaged snack-cake products total sales in Canada, approximately 60% and 29% are made in the provinces of Québec and Ontario, respectively.

ITEM 4 – DESCRIPTION OF THE BUSINESS

The Company operates its business through two sectors and six divisions, the Dairy Products Sector composed of the Canadian and Other Dairy Products Sector and the US Dairy Products Sector, and the Grocery Products Sector. Through its Dairy Products Sectors and its Grocery Products Sector, the Company operates 47 manufacturing facilities and employs approximately 9,100 employees. The Canadian and Other Dairy Products Sector is composed of the Dairy Products Division (Canada), the Dairy Products Division (Argentina), the Dairy

Products Division (Germany) and the Dairy Products Division (United Kingdom); the US Dairy Products Sector is composed of the Cheese Division (USA); and the Grocery Products Sector is composed of the Bakery Division.

Overview

The following table presents the relative importance of the Company's two Sectors over the last two fiscal years.

	Sales by Sector			
	Year ended March 31, 2007		Year ended March 31, 2006	
	Sales (\$000)	% of total sales	Sales (\$000)	% of total sales
Dairy Products Sector				
Canadian and Other Dairy Products Sector	2,794,099	69.8	2,651,402	65.9
US Dairy Products Sector	1,036,830	25.9	1,206,601	30.0
Sub-total.....	3,830,929	95.7	3,858,003	95.9
Grocery Products Sector	170,051	4.3	164,207	4.1
Total.....	<u>4,000,980</u>	<u>100.0</u>	<u>4,022,210</u>	<u>100.0</u>

Canadian and Other Dairy Products Sector

Through its Canadian and Other Dairy Products Sector, Saputo produces and markets, in Canada, mozzarella, cheddar as well as other specialty and fine cheeses, butter, powdered milk and evaporated milk, as well as value-added by-products such as whey powder, ice cream mixes, lactose and whey protein. Saputo also distributes fine imported cheeses to specialty stores. Through its distribution network, it also offers non-dairy products manufactured by third parties. Saputo has established itself as Canada's leading producer of cheese, with a share of approximately 37% of the Canadian natural cheese production. Saputo's cheese products are sold through independent non-exclusive distributors and sales agents as well as through its own distribution network within three market segments: retail, foodservice and industrial.

In Canada, the Company also produces, markets and distributes fluid milk and a wide range of dairy products, including cream, yogurt, sour cream and cottage cheese. The dairy product line is complemented by various non-dairy products, including flavoured coffee creamers, juices and drinks. The Company is one of the three largest fresh milk processors in Canada with an estimated 22% share of the Canadian market. Saputo sells these products mainly to the retail segment through its DSD distribution network operated by Company-owned and independent distributors, as well as through an important home delivery network. These products are also sold to the foodservice segment.

Through its operations in Argentina, the Company produces and markets a wide variety of soft, semi-soft, hard and grated cheeses, as well as butter, cream, milk powder, UHT milk, *dulce de leche* (caramelized milk) and dairy ingredients. Saputo sells these products to the retail and industrial market segments through independent distributors. The Company is the third largest dairy processor in Argentina.

Through its operations in Germany, acquired on April 13, 2006, the Company produces and markets Italian cheese specialties such as mozzarella, ricotta and mascarpone. Saputo sells these products mainly to the retail and industrial market segments.

Through its operations in the United Kingdom, acquired on March 23, 2007, the Company produces mainly mozzarella. Saputo sells this product to the foodservice market segment.

During fiscal 2007, the retail segment accounted for 61.9% of the Canadian and Other Dairy Products Sector sales, the foodservice segment for 29.2% and the industrial segment for 8.9%.

In fiscal 2007, the Canadian and Other Dairy Products Sector represented 69.8% of the Company's total sales. Through this Sector, the Company operates 25 manufacturing facilities in Canada, two in Argentina, one in Germany and one in the United Kingdom and employed, on May 1, 2007, 5,546 employees, 879 of which were located in Argentina, 71 in Germany and 128 in the United Kingdom.

US Dairy Products Sector

Through its US Dairy Products Sector, the Company produces a broad line of mozzarella and specialty cheeses. The Company also produces sweetened condensed milk as well as whey protein concentrates and ingredient blends which are derived from its cheese production. Included with the Land O'Lakes West Coast Acquisition is a by-product drying facility, which will provide greater flexibility in our operations in the United States.

Saputo ranks as one of the top five natural cheese producers in the United States with approximately 5% of natural cheese production. Directly or through independent non-exclusive distributors and sales agents, Saputo services three market segments: retail, foodservice and industrial. During fiscal 2007, the retail segment accounted for 31% of the US Dairy Products Sector's sales volume, the foodservice segment for 48% and the industrial segment for 21%. With the Land O'Lakes West Coast Acquisition, the US Dairy Products Sector's sales volume, on a pro-forma basis, will be 25% in the retail segment, 45% in the foodservice segment and 30% in the industrial segment.

In fiscal 2007, the US Dairy Products Sector represented 25.9% of the Company's total sales. Through this Sector, the Company operates 15 manufacturing facilities in the United States and employed, as of May 1, 2007, 2,378 employees.

Grocery Products Sector

The Company produces, markets and distributes snack-cakes, tarts, cereal bars, fresh cookies and fresh tarts in Canada. These products are sold almost exclusively in the retail market through a DSD distribution network as well as independent distributors. Saputo is the largest manufacturer of snack-cakes in Canada. It also manufactures, on a small scale, products for the US market pursuant to Co-Packing Agreements. In this Sector, the Company operates three manufacturing facilities in the Province of Québec and employed, as of May 1, 2007, 1,178 employees.

Overall Profile

The following tables present the segmentation of total Company sales by region and by market segment for the last two fiscal years:

Total Company Sales – Geographic Segmentation				
	Year ended March 31, 2007		Year ended March 31, 2006	
	Sales (\$000)	% of total sales	Sales (\$000)	% of total sales

Total.....	<u>4,000,980</u>	<u>100.0</u>	<u>4,022,210</u>	<u>100.0</u>

(1) Sales volumes are more representative of our US activities due to the impact of currency fluctuation and the variation of the selling price per pound of cheese on sales dollars. (See table “Sales Volumes – Market Segmentation” in section 4.2.3).

(2) The grocery products are sold almost exclusively in the retail market segment.

4.1 CANADIAN AND OTHER DAIRY PRODUCTS SECTOR

4.1.1 Products

In Canada, Saputo produces, markets and distributes nationally a wide variety of quality cheeses including mozzarella and cheddar, specialty cheeses such as ricotta, provolone, parmesan, feta, havarti, fine cheeses such as brie and camembert, other firm cheeses including brick, colby, farmer, munster and monterey jack, as well as fresh curd and processed cheeses. Saputo’s cheese products are sold under various brand names, such as *Saputo*, *Stella*, *Armstrong*, *Alexis de Portneuf*, *Bari*, *DuVillage de Warwick*, *Sir Laurier d’Arthabaska* and *Kingsey*. Saputo also sells its cheese products under private labels and produces butter, powdered milk and evaporated milk as well as a number of by-products derived from its cheese production, including whey powder, ice cream mixes, lactose and whey protein. The Company’s distribution network distributes fine imported cheeses to specialty stores and other non-dairy products manufactured by third parties.

Saputo is one of the three largest fresh milk processors in Canada, with an estimated 22% share of the Canadian market. Fluid milk is sold under the *Dairyland* brand in Western Canada and Ontario, the *Nutralait* brand in Québec and the *Baxter* brand in the Maritimes. Saputo also produces and markets cream, yogurt, sour cream and cottage cheese. Specialty milk is also produced and marketed under the brand names *Milk 2 Go*, *Lait’s Go*, *Dairyland Plus* and *Nutralait Plus*. In addition to its dairy products line, Saputo also produces and distributes other non-dairy products, including flavoured coffee creamers under the *International Delight*^(*) brand, juices and drinks such as *Sunny Delight*^(*).

In Argentina, Saputo produces and markets a wide variety of soft, semi-soft, hard and grated cheeses, as well as butter, cream, milk powder, UHT milk, *dulce de leche* (caramelized milk) and dairy ingredients. Approximately 37% of its products are sold nationally, while 63% is sold on the export market. These products are sold under the recognized brand names of *Molfino*, *La Paulina* and *Ricrem*.

^(*) Trademarks used under licence.

In Germany, Saputo produces and markets Italian cheese specialties such as mozzarella, ricotta and mascarpone. The majority of these products are sold on the European market.

In the United Kingdom, Saputo produces and markets mainly mozzarella, which is sold almost exclusively on the European market. This product is mainly sold under the *Danscorella* brand name.

4.1.2 Production

Raw Materials

Milk represents the primary cost incurred by the Company in the manufacturing of dairy products. In Canada, due to the regulated nature of the Canadian dairy industry, Saputo sources its milk through the milk boards in each province. The Company sources its other raw materials from various suppliers.

In Argentina, Saputo sources its milk from farmers and approximately 2.4% of our milk supply is sourced from Saputo's farms. The Company sources its other raw materials from various suppliers.

In Germany, Saputo sources the majority of its milk from a milk dealer. The Company sources its other raw materials from various suppliers.

In the United Kingdom, Saputo sources its milk from farmers. The Company sources its other raw materials from various suppliers.

Facilities

In the Canadian and Other Dairy Products Sector, the Company operates a total of 29 manufacturing facilities, 25 of which are located in Canada, two in Argentina, one in Germany and one in the United Kingdom. The Company owns all of its plants with the exception of one facility located in Calgary, Alberta.

The Company operates 11 facilities in Western Canada. These facilities have the overall weekly capacity to process approximately 29 million litres of milk into cheese, fluid milk and other related dairy products and to produce processed cheese.

In Ontario, the Company operates 3 facilities, with an overall weekly capacity to process approximately 6 million litres of milk into cheese or fluid milk.

In Québec and the Maritimes, the Company operates a total of 10 facilities. These facilities have an overall weekly capacity to process approximately 19 million litres of milk into cheese, fluid milk and other related dairy products as well as liquid whey in these facilities.

In Argentina, the Company operates two facilities with an overall weekly capacity to process approximately 20 million litres of milk into cheese and other related dairy products.

In Germany, the Company operates one facility with an overall weekly capacity to process approximately 2.1 million litres of milk into cheese.

In the United Kingdom, the Company operates one facility with an overall weekly capacity to process approximately 2.9 million litres of milk into cheese.

The facilities operating in the Canadian and Other Dairy Products Sector have, with their overall production capacity combined, an excess capacity of 31% for the Canadian cheese operations, 36% for the Canadian fluid milk operations, 30% in Argentina, 38% in Germany and 28% in the United Kingdom.

4.1.3 Markets

Saputo is Canada's leading producer of cheese with a share of approximately 37% of the Canadian natural cheese production. Saputo sells its products to the retail, foodservice and industrial market segments. The Company also distributes fine imported cheeses to specialty stores and provides various non-dairy products manufactured by third parties that are complementary to the sale of its cheeses. The Company is one of the three largest fresh milk processors in Canada with an estimated 22% share of the Canadian market. Saputo also sells, through its Canadian operations, cheese, lactose, whey powder, ice cream mixes and whey protein to a vast array of clients in Canada, Europe, South America, Asia and Africa.

Saputo is the third largest dairy processor in Argentina, processing approximately 7% of the entire milk production. The Company sells its products nationally to the retail and industrial market segments. Approximately 37% of the products manufactured in Argentina are sold in the local market, while 63% are exported to over 25 countries.

Saputo is a small player in Germany processing less than 1% of the entire milk production. The Company sells its products nationally mainly to the retail and industrial market segments. The majority of its products are sold on the European market.

Saputo is a small player in the United Kingdom processing less than 1% of the entire milk production. The Company sells its products mainly to the foodservice market segment and almost exclusively on the European market.

Clientele

Within the Canadian and Other Dairy Products Sector, the Company services three market segments: retail, foodservice and industrial.

The following table illustrates, for the Canadian and Other Dairy Products Sector, the segmentation of sales by market segment for each of the last two fiscal years:

Canadian and Other Dairy Products Sector – Sales – Market Segmentation				
	Year ended March 31, 2007		Year ended March 31, 2006	
	Sales (\$000)	% of total sales	Sales (\$000)	% of total sales
Retail	1,728,114	61.9	1,565,231	59.0
Foodservice	816,425	29.2	747,865	28.2
Industrial	249,560	8.9	338,306	12.8
Total	<u>2,794,099</u>	<u>100.0</u>	<u>2,651,402</u>	<u>100.0</u>

Retail. Saputo sells both branded and private label dairy products to its retail customers which include supermarket chains, mass merchandisers, convenience stores, independent retailers, warehouse clubs and specialty cheese boutiques. In fiscal 2007, the majority of Saputo's retail sales was in branded products with the remainder being private label. Saputo's retail dairy products are sold in the dairy case and deli cheese counter sections of stores. Saputo provides its retail customers with a wide range of dairy products, including cheddar, mozzarella, fluid milk, cream, yogurt, sour cream, cottage cheese, specialty cheeses and fine cheeses. The dairy product line is complemented with various non-dairy products, including flavoured coffee creamers, juices and drinks. Saputo also provides milk powder from its Argentina operations to its retail customers.

Foodservice. Foodservice customers include broad-line distributors, restaurants (corporate restaurant chains, franchisees and individually-owned), hotels and institutions. Saputo provides its foodservice customers

with branded and private label cheese products as well as fluid milk products. Through its distribution network, Saputo also provides non-dairy products manufactured by third parties. Saputo also produces soft-serve dairy mixes for quick service restaurant chains.

Industrial. Industrial clients include processors who use the Company's products as an ingredient in the preparation of other food items. The Company supplies cheese to processors of frozen entrées as well as to frozen pizza manufacturers. The Company also produces by-products from its Canadian cheese manufacturing activities such as lactose, whey powder and whey protein. The Company sells, through its Canadian industrial segment and its operations in Argentina, cheese, lactose, whey powder, ice cream mixes, whey protein, milk powder, evaporated milk, butter and cream to a vast array of clients in Canada, Argentina, Europe, South America, Asia and Africa.

4.1.4 Distribution

In Canada, sales of dairy products are made through direct shipments to certain large retail, foodservice and industrial customers as well as to national and regional third party distributors. Saputo has also developed a nation-wide distribution network for its dairy operations, comprised of 25 distribution centres and warehouses and over 500 distribution routes located across Canada. Saputo also operates one of the largest home delivery networks for milk and other food products in Canada.

In Argentina, the Company distributes its products through third party distributors which are supplied through the Company's six distribution centres located across the country. This network services large retail chains, distributors and industrial customers. In Germany and the United Kingdom, the Company distributes its products to its customers mainly through third party carriers.

4.1.5 Competition

With respect to its cheese products, the Company competes mainly in Canada with Agropur coopérative agro-alimentaire ("Agropur"), Kraft General Foods Canada Inc. (through the production volumes of Agropur for its natural cheese) and Parmalat Canada Inc. ("Parmalat"). Saputo has established itself as Canada's leading producer of cheese with a share of approximately 37% of the Canadian natural cheese production.

Saputo holds an estimated 22% share of the Canadian market for fluid milk which ranks it among the three largest fresh milk processors, all of which hold similar market shares. The Company faces very broad competition in most product categories, with specific competitors varying widely by region. Among the Company's largest competitors are Agropur and Parmalat.

The Company is the third largest dairy processor in Argentina, processing approximately 7% of the entire milk production. The Company competes mainly with Mastellone Hermanos S.A. and Sancor Cooperativas Unidas Limitada which hold the largest market shares in Argentina. Other competitors include Milkaut S.A., Sucesores de Alfredo Williner S.A. and Veronica S.A.

The Company is a small player in Germany and it competes mainly with Goldsteig Käsereien Bayerwald GmbH, Zott GmbH & Co. KG., Galbani and Lactalis Deutschland GmbH.

The Company is a small player in the United Kingdom and it competes mainly with Glanbia plc, Dairy Crest Group plc and Groupe Lactalis.

4.1.6 Employee Relations

As at May 1, 2007, the Company's Canadian and Other Dairy Products Sector had 4,468 employees in Canada, 879 in Argentina, 71 in Germany and 128 in the United Kingdom. Approximately 44% of the Canadian and Other Dairy Products Sector's work force is unionized.

The Company does not currently foresee any labour unrest in connection with the renewal of collective agreements expiring in fiscal 2008. All agreements that expired in fiscal 2007 were either renewed upon

satisfactory terms or continue to govern during ongoing negotiations, which are expected to result in satisfactory renewals. The Company has good employee relations. The loyalty and dedication of its employees are key elements in the Company's performance. In Management's opinion, this is the direct result of the family culture that has permeated the entire Company.

4.2 US DAIRY PRODUCTS SECTOR

4.2.1 Products

Saputo produces a broad line of mozzarella and specialty cheeses such as ricotta, provolone, blue, swiss, parmesan and romano, which are sold under various brand names such as *Saputo*, *Stella*, *Frigo*, *Frigo Cheese Heads*, *Dragone*, *Lorraine* and *Treasure Cave*, as well as under private label. The Company also produces sweetened condensed milk as well as whey powder, whey protein concentrates and ingredient blends which are derived from its cheese production. Included with the Land O'Lakes West Coast Acquisition is a by-product drying facility, which will provide greater flexibility in our operations in the United States.

4.2.2 Production

Raw Materials

In the United States, Saputo sources its milk primarily from cooperatives. In connection with the Land O'Lakes West Coast Acquisition, the Company secured a long term milk supply agreement pursuant to which Land O'Lakes will be supplying to Saputo over 2 billion pounds of milk annually for one of its manufacturing facilities in Tulare, California. Milk represents the primary costs incurred by the Company in the manufacturing of the dairy products. The Company sources its other raw materials from various suppliers.

Facilities

Within this Sector, the Company operates 15 manufacturing facilities which are all owned by the Company.

In the American Northeast, the Company operates 2 plants with an overall weekly capacity to process approximately 12.9 million litres of milk into cheese. The Company also operates 9 facilities in the Midwest, with a total overall weekly capacity to process approximately 18.2 million litres of milk into cheese and related dairy products and to produce canned milk products. Finally, the Company operates 4 facilities in the Western United States, which have a combined weekly capacity to process approximately 24.7 million litres of milk into cheese. The U.S. facilities have, with their overall production capacity combined, an excess capacity of 6%.

4.2.3 Markets

Saputo ranks as one of the leading natural cheese producers in the United States with approximately 5% of natural cheese production. The Company competes in the United States natural cheese industry by selling branded and private label products to retail, foodservice and industrial customers.

Clientele

Within the US Dairy Products Sector, the Company services three market segments: retail, foodservice and industrial.

The following table illustrates, for the US Dairy Products Sector, the segmentation of sales by market segment for each of the last two fiscal years:

US Dairy Products Sector – Sales Volumes – Market Segmentation ¹		
	Year ended March 31, 2007	Year ended March 31, 2006
	% of total sales volumes	% of total sales volumes
Retail	31	29
Foodservice	48	45
Industrial	21	26
Total	<u>100</u>	<u>100</u>

(1) Sales volumes are more representative of our US activities due to the impact of currency fluctuation and the variation of the selling price per pound of cheese on sales dollars.

Retail. Saputo sells both branded and private label products to its retail customers which include supermarket chains, mass merchandisers, independent retailers, warehouse clubs and specialty cheese boutiques. In fiscal 2007, the majority of Saputo’s retail sales was in branded products with the remainder being private label. Saputo’s retail dairy products are sold in the dairy case and deli cheese counter sections of stores. Saputo also provides its retail customers with specialty cheeses and fine cheeses.

Foodservice. Foodservice customers include broad-line distributors, restaurants (corporate restaurant chains, franchisees and individually-owned) and hotels. Saputo provides its foodservice customers with branded and private label products.

Industrial. Industrial clients include processors who use the Company’s products as an ingredient in the preparation of other food items. The Company supplies cheese to numerous processors of frozen entrées, including frozen pizza manufacturers and sauces and dressings manufacturers. The Company also produces by-products from its cheese manufacturing activities such as whey protein.

4.2.4 Distribution

Sales are made through direct shipments to certain large retail, foodservice and industrial customers as well as to national and regional third party distributors.

4.2.5 Competition

In the United States, the Company competes on a national basis with regional and national competitors including Dairy Farmers of America, Foremost Farms USA, Kraft Foods Inc., Lactalis USA, Inc. (Sorrento), Leprino Foods Company and Sargento Foods.

4.2.6 Employee Relations

As at May 1, 2007, the Company’s US Dairy Products Sector had 2,378 employees. Approximately 26% of the workforce is unionized.

The Company does not currently foresee any labour unrest in connection with the renewal of collective agreements expiring in fiscal 2008. All agreements that expired in fiscal 2007 were renewed upon satisfactory terms. The Company has good employee relations in the United States. The loyalty and dedication of its employees are key elements in the Company’s performance. In Management’s opinion, this is the direct result of the family culture that has permeated the entire Company.

4.3 GROCERY PRODUCTS SECTOR

4.3.1 Products

Within this Sector, the Company produces and markets snack-cakes, tarts, cereal bars, fresh cookies and fresh tarts, which are sold almost exclusively in the retail market. Saputo occupies a predominant position in the snack-cake market in Canada. Its products are sold under the *Vachon*, *Hop&Go!*, *Hostess* and *Rondeau* umbrella brands which carry recognized brand names such as *Jos Louis*, *Ah Caramel!*, *Passion Flakie*, *May West*, *Granny's*, *Big Daddy*, *Authentic* and others, some of which are now offered in a trans-fat-reduced or trans-fat-free formula.

4.3.2 Production

Raw Materials

The Company generally sources its raw materials from various suppliers.

Facilities

Within this Sector, Saputo operates three manufacturing facilities in the Province of Québec, two of which are owned by the Company, and have an overall excess capacity of 26%.

4.3.3 Markets and Distribution

The Company is the largest manufacturer of snack-cakes in Canada. Saputo sells its snack-cakes products almost exclusively in the retail market segment and its fresh cookies and tarts mainly in the retail market and the foodservice. The Company's sales for this Sector are almost exclusively in branded products. During fiscal 2007, the Company manufactured, on a small scale, snack-cakes products for the US market pursuant to Co-Packing Agreements. The Company's grocery products are distributed mainly through its DSD distribution network.

4.3.4 Competition

The Company competes with regional manufacturers which enjoy significantly smaller market shares than Saputo. This Sector's competitors include namely McKee Foods Corporation, Pâtisserie Chevalier Inc., Biscuits Leclerc Ltd., Kellogg Canada Inc. and The Quaker Oats Company of Canada Limited.

4.3.5 Employee Relations

As at May 1, 2007, the Grocery Products Sector had 1,178 employees, approximately 81% of which were unionized. The Company does not currently foresee any labor unrest in connection with the renewal of collective agreements expiring in fiscal 2008. All agreements that expired in fiscal 2007 were renewed upon satisfactory terms.

4.4 CAPITAL EXPENDITURES

Management believes that the Company has adequate manufacturing capacity to meet current and near term demand for its products. It is Saputo's intention to continue to expand and modernize its plants, with investments being focused on equipment and processes designed to increase efficiency. More specifically, during the last five fiscal years, Saputo incurred \$415 million in capital expenditures. In fiscal 2007, the Company spent \$76 million and, in fiscal 2008, Saputo expects to incur capital expenditures of approximately \$118 million.

With regards to depreciation expense, during the last five fiscal years, Saputo recorded \$344 million in depreciation expense. In fiscal 2007, depreciation expense totalled \$72 million and, in fiscal 2008, the Company expects to incur approximately \$84 million in depreciation expense.

4.5 ENVIRONMENT

The Company's global operations are subject to various federal, provincial, state, municipal and local laws and regulations relating to the protection of the environment. Compliance with these laws and regulations requires the Company to incur expenses and to monitor its operations on an ongoing basis. The Company believes that its operations are in compliance in all material respects with currently applicable environmental laws and regulations except as discussed below. It is the Company's intention to comply with all applicable environmental laws and regulations.

The Company has an environmental policy directed towards minimizing the environmental impact of all its activities. Management systems, including audit, assessment and reporting elements, support the application of the policy.

Through past acquisitions, the Company inherited historical contamination at some facilities. Most of these sites have been contaminated by former petroleum storage tanks, all of which have been removed. At each of these sites, the Company is either implementing proper remediation measures, or proceeding with additional investigation to determine if further action is required. In some cases, with the consent of governmental authorities, the Company continues to monitor the situation to confirm that no further action is required. The Company does not expect that major expenditures will be required to deal with the contamination at these facilities.

During fiscal 2007, the Company spent approximately \$3 million to comply with existing environmental laws and regulations and improve plant efficiency to reduce noise emission and wastewater discharge, to update or remove underground storage tanks, to address contamination issues and to improve wastewater treatment systems at a number of its facilities in Canada, the United States and Argentina. For fiscal 2008, Management estimates similar expenditures at \$3 million and approximately \$1.2 million for costs associated with closure of certain facilities in Canada and the United States. Management believes that compliance with currently applicable environmental protection requirements will not have a material effect on the Company's earnings or competitive position during fiscal 2008.

4.6 TRADEMARKS

As the Company is involved in the production, sale and distribution of food products, it relies on brand recognition and loyalty from its clientele in addition to relying on the quality of its products. The Company focuses on certain established brands and believes that its trademarks are recognized by consumers for quality and reliability. Hence, Saputo takes appropriate measures to protect and enforce its intellectual property.

4.7 RISKS AND UNCERTAINTIES

Product Liability

Saputo's operations are subject to certain dangers and risks of liability faced by all food processors, such as the potential contamination of ingredients or products by bacteria or other external agents that may accidentally be introduced into products or packaging. Saputo has quality control procedures in place within its operations to reduce such risks and has never experienced any material contamination problems with its products. However, the occurrence of such a problem could result in a costly product recall and serious damage to Saputo's reputation for product quality. We maintain product liability and other insurance coverage that we believe to be generally in accordance with the market practice in the industry.

Supply of Raw Materials

Saputo purchases raw materials that may represent up to 85% of the cost of products. It processes raw materials into the form of finished edible products intended for resale to a broad range of consumers. Availability of raw materials as well as variations in the price of foodstuffs can therefore influence Company results upwards or downwards, and the effect of any increase of foodstuff prices on results depends on the Company's ability to transfer those increases to its customers, and this in the context of a competitive market.

US and International Markets

The price of milk as raw material and the price of our cheese products in the United States, Argentina, Germany and the United Kingdom and by-products on international markets are based on market supply and demand forces. The prices are tied to numerous factors, such as the health of the economy and supply and demand levels for dairy products in the industry. Price fluctuations may affect the Company's results. The effect of such fluctuations on our results will depend on our ability to implement mechanisms to reduce them.

Competition

The food processing industry in North America is extremely competitive. Saputo participates in this industry primarily through its dairy operations. The Canadian dairy industry is highly competitive and is comprised of three major competitors, including Saputo. In the United States, Argentina, Germany and the United Kingdom, Saputo competes in the dairy industry on a national basis with several regional and national competitors. Our performance will be dependent on our ability to continue to offer quality products at competitive prices, and this applies to all the countries in which we operate.

Consolidation of Clientele

During the last few years, we have seen important consolidation in the food industry in all market segments. Given that we serve these segments, the consolidation within the industry has resulted in a decrease in the number of clients and an increase in the relative importance of some clients. Within the retail, foodservice and ingredient market segments, no customer represents more than 10% of our total consolidated sales, except for one retail customer representing 11.2% to which we sell both branded and private label products. Our ability to continue to service our clients in all the markets that we serve will depend on the quality of our products, services and the prices of our products.

Environment

Saputo's business and operations are subject to environmental laws and regulations. We believe that our operations are in compliance, in all material aspects, with such environmental laws and regulations, except as disclosed elsewhere in this Annual Information Form. Any new environmental laws or regulations or more vigorous regulatory enforcement policies could have a material adverse effect on the financial position of Saputo and could require significant additional expenditures to achieve or maintain compliance.

Consumer Trends

Demand for our products is subject to changes in consumer trends. These changes may affect the Company's earnings. In order to constantly adapt to these changes, the Company innovates and develops new products.

Financial Risk Exposures

Saputo has financial risk exposure to varying degrees relating to the foreign currency of its United States, Argentina, Germany and United Kingdom operations. Approximately 26% and 5% of sales are realized in the United States and in Argentina, respectively. However, the cash flows from these operations act as a natural hedge against exchange risk. Cash flows from the United States also constitute a natural hedge against the exchange risk related to debt expressed in US dollars. As at March 31, 2007, the Company's long-term debt was made up of the US senior notes only, which are at a fixed rate throughout their term.

Legislative, Regulatory, Normative and Political Considerations

The Company is subject to local, provincial, state, federal and international laws, regulations, rules and policies as well as to social, economical and political contexts prevailing in places where it conducts its activities.

Consequently, the modification or change of any of these elements may have an unfavourable impact on Saputo results and operations and require that important expenses be made in order to adapt to or comply with it.

More specifically, the production and distribution of food products are subject to federal, state, provincial and local laws, rules, regulations and policies and to international trade agreements, all of which provide a framework for Saputo's operations. The impact of new laws and regulations, stricter enforcement or interpretations or changes to enacted laws and regulations will depend on our ability to adapt and comply. We are currently in compliance with all important government laws and regulations and maintain all important permits and licenses in connection with our operations.

Growth by Acquisitions

The Company plans to grow both organically and through acquisitions. Historically, the Company has grown through acquisitions and should reasonably and in large part rely on new acquisitions to pursue its growth. The ability to properly evaluate the fair value of the businesses being acquired, to properly evaluate the time and human resources required to successfully integrate their activities with these of the Company as well as the Company's capability to realize synergies, improvements and the expected profit and to achieve anticipated returns constitute inherent risks related to acquisitions.

Tariff Protection

Dairy-producing industries are still partially protected from imports by tariff-rate quotas which permit a specific volume of imports at a reduced or zero tariff and impose significant tariffs for greater quantities of imports. There is no guarantee that political decisions or amendments to international trade agreements will not, at some point in the future, result in the removal of tariff protection in the dairy market, resulting in increased competition. Our performance will be dependent on our ability to continue to offer quality products at competitive prices.

ITEM 5 – DIVIDEND POLICY

Saputo has a policy of declaring quarterly cash dividends on the Common Shares. In fiscal 2005, 2006 and 2007, Saputo declared respectively the following yearly dividends on the common shares, \$0.60, \$0.72 and \$0.80 per share. In fiscal 2007, the Company's dividend policy was reviewed by the Board of Directors and the quarterly dividend of \$0.18 per share, representing a yearly dividend of \$0.72 per share, was increased on August 2, 2006 to \$0.20 per share, representing a yearly dividend of \$0.80 per share. The balance of the Company's earnings are reinvested to finance the growth of its business. The Company's dividend policy will be reviewed from time to time, but at least once annually, by the Board of Directors and will depend on Saputo's financial condition, results of operations, capital requirements and such other factors as the Board of Directors, in its sole discretion, deems relevant.

ITEM 6 – CAPITAL STRUCTURE

The articles of the Company provide that its authorized share capital shall be composed of an unlimited number of Common Shares and an unlimited number of Preferred shares, issuable in series, all without nominal or par value. As of the close of business on May 28, 2007, 103,782,700 Common Shares and no Preferred shares were issued and outstanding.

The following is a summary of the material provisions which attach to the classes of shares of the capital stock of Saputo and is qualified by reference to the full text of the rights, privileges, restrictions and conditions of such shares.

Common Shares

The Common Shares carry and are subject to the following rights, privileges, restrictions and conditions:

Voting

Each Common Share entitles its holder to receive notice of and to attend all general and special meetings of shareholders of Saputo, other than meetings at which only the holders of a particular class or series are entitled to vote, and each such Common Share entitles its holder to one vote.

Dividends

The holders of Common Shares are, in the discretion of the Board of Directors, entitled to receive, out of any amounts properly applicable to the payment of dividends and after the payment of any dividends payable on the Preferred shares, any dividends declared and payable by Saputo on the Common Shares.

Dissolution

The holders of Common Shares shall be entitled to share equally in any distribution of the assets of Saputo upon the liquidation, dissolution or winding-up of Saputo or other distribution of its assets among its shareholders. Such participation is subject to the rights, privileges, restrictions and conditions attached to any issued and outstanding Preferred shares or shares of any other class ranking prior to the Common Shares.

Preferred Shares

The Preferred shares may be issued from time to time in one or more series, the terms of each series including the number of shares, the designation, rights, preferences, privileges, priorities, restrictions, conditions and limitations to be determined at the time of creation of each such series by the Board of Directors of Saputo without shareholder approval, provided that all Preferred shares will rank, with respect to dividends and return of capital in the event of liquidation, dissolution, winding-up or other distribution of assets of Saputo for the purpose of winding-up its affairs, *pari passu* among themselves and in priority to all shares of any class ranking junior to the Preferred shares.

ITEM 7 – MARKET FOR SECURITIES

The Common Shares of Saputo are listed on the Toronto Stock Exchange under the stock market symbol “SAP”. The following table shows the price range and trading volume of the Common Shares for each of the months of the last fiscal year:

Price Range and Trading Volume of the Common Shares			
Month	High (\$)	Low (\$)	Volume
April 2006	35.06	32.05	3,758,678
May 2006	34.55	32.51	2,209,454
June 2006	36.43	33.05	4,059,267
July 2006	35.89	34.24	1,373,483
August 2006	38.59	34.80	2,418,088
September 2006	37.80	35.50	1,634,953
October 2006	37.94	34.91	1,521,877
November 2006	38.40	35.83	2,767,487
December 2006	38.45	36.25	1,585,747
January 2007	38.41	36.72	2,320,742
February 2007	43.35	37.00	4,513,717
March 2007	46.39	41.00	5,408,715

ITEM 8 – DIRECTORS AND OFFICERS

8.1 DIRECTORS

The following table sets forth each director's name and Province/State and Country of residence, the year in which he or she first became a director, his or her principal occupation and the number of Common Shares beneficially owned, directly or indirectly, or over which control or direction was exercised by each director, as at May 28, 2007. Directors are elected until the next annual meeting of shareholders or, in the case of a vacancy or resignation, until a successor is elected or appointed.

Name and Province/State and Country of residence	Director since	Principal occupation	Common Shares beneficially owned or over which control or direction was exercised as at May 28, 2007
EMANUELE (LINO) SAPUTO ⁽²⁾ Québec, Canada	1992	Chairman of the Board of the Company	34,939,962 ⁽¹⁾
LINO A. SAPUTO, JR. Québec, Canada	2001	President and Chief Executive Officer of the Company	33,602
ANDRÉ BÉRARD ⁽³⁾⁽⁵⁾ Québec, Canada	1997	Corporate Director	8,125
LUCIEN BOUCHARD ⁽³⁾ Québec, Canada	2004	Senior Partner, Davies Ward Phillips & Vineberg LLP	--
PIERRE BOURGIE ⁽³⁾⁽⁴⁾ Québec, Canada	1997	President and Chief Executive Officer of Société Financière Bourgie Inc. (a holding company)	465,000
FRANK A. DOTTORI ⁽⁴⁾⁽⁶⁾ Québec, Canada	2003	President of Fadco Consulting Inc. (a consulting company)	200
JEAN GAULIN ⁽³⁾ Texas, USA	2003	Corporate Director	28,700
CATERINA MONTICCIOLO, CA Québec, Canada	1997	President of Julvest Capital Inc. (a holding company)	119,000
PATRICIA SAPUTO, CA, ICD.D Québec, Canada	1999	Chief Financial Officer of Placements Italcant Inc. (a diversified investment company)	1,800
LOUIS A. TANGUAY ⁽⁴⁾ Québec, Canada	1997	Corporate Director	4,000

- (1) The shares are held by Jolina Capital Inc. and Gestion Jolina Inc., both of which are holding companies controlled by Mr. Emanuele (Lino) Saputo.
- (2) Mr. Emanuele (Lino) Saputo is a director of Arbec Forest Products Inc. (formerly Uniforêt Inc.) which filed for protection under the *Companies' Creditors Arrangement Act* on April 17, 2001. In May 2003, Uniforêt Inc. entered into a plan of arrangement with its creditors. In February 2004, it completed the implementation of this plan.
- (3) Members of the Corporate Governance and Human Resources Committee. The Chairman of the Committee is Mr. André Bérard.
- (4) Members of the Audit Committee. The Chairman of the Committee is Mr. Louis A. Tanguay.
- (5) Lead Director.
- (6) Mr. Frank A. Dottori was a director of Gestion Papiers Gaspésia Inc. and its subsidiary, Papiers Gaspésia Inc., until October 29, 2003. On January 30, 2004, Papiers Gaspésia Inc. and Papiers Gaspésia Limited Partnership filed for protection under the *Companies' Creditors Arrangement Act*. On July 4, 2005, the Plan of Arrangement submitted by Papiers Gaspésia Inc. and Papiers Gaspésia Limited Partnership to their creditors was homologated by the Court and is being implemented since then.

During the last five years, all of the above directors have been engaged in their present principal occupations or in other executive capacities with the companies indicated opposite their name or with related or affiliated companies, except for: Mr. André Bérard who, until March 10, 2004, was Chairman of the Board of a Canadian Chartered Bank; and Mr. Frank A. Dottori who, until January 26, 2006, was President and Chief Executive Officer of Tembec Inc. (a forest products company).

Information as to shares beneficially owned by each director, or over which each exercised control or direction, as at May 28, 2007, has been furnished by the directors individually.

Additional information concerning the shareholdings of, options and deferred share units granted to, directors is included in the section entitled "Election of Directors" appearing on page 2 of the Company's Management Proxy Circular dated June 5, 2007, which information is incorporated herein by reference.

8.2 EXECUTIVE OFFICERS

The following table sets forth the name, Province/State and Country of residence and position with the Company of each person who is an executive officer of the Company as of the date hereof:

Name and Province/State and Country of residence	Position
Emanuele (Lino) Saputo Québec, Canada	Chairman of the Board
Lino A. Saputo, Jr. Québec, Canada	President and Chief Executive Officer
Terry Brockman Wisconsin, United States	President and Chief Operating Officer Cheese Division (USA)
Louis-Philippe Carrière, FCA Québec, Canada	Executive Vice-President Finance and Administration and Secretary
Dino Dello Sbarba, FCMA Québec, Canada	President and Chief Operating Officer Dairy Products Division (Canada)
Carmine De Somma Québec, Canada	President and Chief Operating Officer Dairy Products Division (Argentina)
Pierre Leroux Québec, Canada	Executive Vice-President Human Resources and Corporate Affairs
Claude Pinard Québec, Canada	President and Chief Operating Officer Bakery Division

During the last five years, all of the above executive officers have held the principal occupation indicated above or other executive capacities with the Company.

As at May 28, 2007, the directors and executive officers of Saputo, as a group, beneficially owned, directly or indirectly, or exercised control or direction over, an aggregate of 35,630,136 Common Shares, representing approximately 34% of the outstanding Common Shares of the Company.

ITEM 9 – LEGAL PROCEEDINGS

The Company is defendant to certain claims arising from the normal conduct of its business. Management believes that the final resolution of these claims will not have a material adverse effect on its earnings or financial

position.

ITEM 10 – INTEREST OF MANAGEMENT AND OTHERS IN TRANSACTIONS

In the normal course of business, the Company receives and provides goods and services from and to companies subject to significant influence by its principal shareholder. These goods and services of an immaterial amount are compensated by a counterpart equal to the fair market value. Reference is made to note 17 to the Consolidated Financial Statements of the Company that describes the related party transactions. See “Additional Information”.

ITEM 11 – EXPERTS

Saputo’s auditors are Deloitte & Touche LLP. Saputo’s Consolidated Financial Statements as at March 31, 2007 and for the year then ended have been filed under National Instrument 51-102 in reliance on the report of Deloitte & Touche LLP, independent chartered accountants, given on their authority as experts in auditing and accounting.

ITEM 12 – TRANSFER AGENTS AND REGISTRARS

The transfer agents and registrar of the Company is Computershare Trust Company of Canada at its principal offices in Montreal and Toronto.

ITEM 13 – MATERIAL CONTRACTS

No material contract outside the ordinary course of business was entered into by the Company since January 1, 2002.

ITEM 14 – AUDIT COMMITTEE INFORMATION

14.1 AUDIT COMMITTEE’S CHARTER

The Audit Committee’s charter is included in Appendix A.

14.2 COMPOSITION AND RELEVANT EDUCATION AND EXPERIENCE

All members of the Audit Committee are independent and financially literate.

The following table sets forth each Audit Committee member’s name and education and experience relevant to the performance of his responsibilities as an Audit Committee member.

Name	Education and experience
Pierre Bourgie	Completed a bachelor’s degree in commerce. Mr. Bourgie was President of Urgel Bourgie Ltd. until the sale of this company in 1996. Since then, he is responsible for the investment activities of the Bourgie family and has founded two (2) investment funds, Les Partenaires de Montréal, specialized in business financing, and Ipso Facto, specialized in real estate investments. Mr. Bourgie is the President of these two (2) funds. Mr. Bourgie also serves on the board of directors of various companies, where, for certain of them, he is a member of the audit committee, including one where he is the Chair of the committee. Mr. Bourgie’s experiences required and contributed to the development of his ability to analyse financial statements and understand Generally Accepted Accounting Principles (“GAAP”).

Frank A. Dottori	Completed a bachelor's degree in chemical engineering and applied science. In 1973, Mr. Dottori and three other executives founded Tembec inc. and Mr. Dottori was Tembec's President and Chief Executive Officer until January 26, 2006. Since May 2006, he is the President of Fadco Consulting Inc. Mr. Dottori has served as a Governor of the Montreal Stock Exchange, Director of the Canadian Market Productivity Centre and on the Board of Directors of several organizations and corporations. He is the current Chair of the Pulp and Paper Research Institute of Canada and Vice-Chairman of Habitat for Humanity Canada. Mr. Dottori's professional experiences required and contributed to the development of his ability to analyse financial statements and understand GAAP.
Louis A. Tanguay	Completed a bachelor's degree in commerce. Mr. Tanguay occupied several executive positions within the BCE organization requiring his involvement in the preparation of financial statements and the analysis of financial and operational performances of BCE related companies. More specifically, he was Chairman of the Board of Telebec, Executive Vice President (Corporate) of Bell Canada, President of Bell Québec and President of Bell Canada International. He was also actively involved in the acquisition, merger and disposal of companies. Mr. Tanguay has an extensive past and present experience as a corporate director of public companies involving, for some of them, participation in audit committees. Mr. Tanguay's professional experiences required and contributed to the development of his ability to analyse financial statements and understand GAAP.

14.3 POLICIES AND PROCEDURES REGARDING THE SERVICES RENDERED BY THE EXTERNAL AUDITORS

The Company has a policy with respect to services rendered by its external auditors (the "**Policy**"). The Policy divides the services in three categories: (i) services that are considered audit related ("**Audit Services**") and therefore covered by the annual audit budget; (ii) services that are considered indirectly audit related ("**Consultation Services**") but not covered by the annual audit budget; and (iii) non-audit services ("**Non-Audit Services**"). Pursuant to the Policy, no services other than the Audit Services can be provided by the Company's external auditors unless the following conditions are met:

Consultation Services

- (i) The Audit Committee has pre-approved the Consultation Services to be provided; or
- (ii) the aggregate amount of all services (other than Audit Services) not pre-approved by the Audit Committee and rendered during the financial year in which the Consultation Services are to be rendered do not exceed the highest of \$25,000 or five percent (5%) of the total amount of fees paid by the Company during the financial year in which the Consultation Services are to be rendered.

Non-Audit Services

- (i) The attribution of the Non-Audit Services to the external auditors of the Company presents an added-value for the Company; and
- (ii) the Audit Committee pre-approved the services to be rendered.

Finally, the Policy requires that the management of the Company presents to the Audit Committee, on a quarterly basis, a statement of the services (other than the Audit Services) rendered by the external auditors of the Company as well as any mandate given to other accounting firms.

14.4 EXTERNAL AUDITOR SERVICE FEES BY CATEGORY

The following table sets out, by categories, the fees billed by Deloitte & Touche LLP, the Company's external auditors, for the fiscal years 2007 and 2006:

Fee Category	2007	2006
	(\$)	(\$)
Audit Fees	765,617	628,325
Audit Related Fees	122,931	242,796
Tax Fees	107,877	86,116
All Other Fees	-	-
Total	<u>996,425</u>	<u>957,237</u>

"Audit Fees" include the aggregate professional fees billed by Deloitte & Touche LLP for the audit of the consolidated annual financial statements.

"Audit Related Fees" include the aggregate fees billed by Deloitte & Touche LLP for services that would normally be performed by the external auditors. More specifically, these services include, among others, pension plans audits, attest services that are required by statute or regulation, assistance in preparing for the future requirements on internal control certification, consultations regarding financial reporting and accounting standards and translation services.

"Tax Fees" include the aggregate fees billed by Deloitte & Touche LLP for tax compliance, tax advice, tax planning and advisory services relating to the preparation of corporate tax, capital tax and sales tax returns.

"All Other Fees" include the aggregate fees billed by Deloitte & Touche LLP for all services other than those reported under Audit Fees, Audit Related Fees and Tax Fees.

ITEM 15 - ADDITIONAL INFORMATION

Additional information, including disclosure of the Company's corporate governance practices, remuneration and indebtedness to the Company of the directors and officers, principal holders of Saputo's securities, and options to purchase securities, where applicable, is included in Saputo's Management Proxy Circular dated June 5, 2007 and may be found on SEDAR at www.sedar.com. Additional financial information is included in the Consolidated Financial Statements of Saputo and Notes thereto and in the accompanying Management's Analysis for the fiscal year ended March 31, 2007. Copies of these documents may be obtained upon request to the Secretary of the Company, at its head office, 6869 Métropolitain Boulevard East, Saint-Léonard, Québec, H1P 1X8, Telephone: (514) 328-6662.

In addition, when the securities of Saputo are in the course of a distribution pursuant to a short form prospectus or when a preliminary short form prospectus has been filed, the following documents may be obtained free of charge from the Secretary of the Company:

- (i) one copy of the Annual Information Form, together with one copy of any documents or portion thereof incorporated by reference therein;
- (ii) one copy of the comparative financial statements of Saputo for its most recently completed fiscal year together with the report of the auditor thereon and one copy of any interim financial statements of Saputo subsequent to the financial statements for its most recently completed fiscal year;

(iii) one copy of Saputo's Management Proxy Circular for its most recent annual meeting of shareholders which involved the election of directors; and

(iv) one copy of any other documents that are incorporated by reference in the preliminary short form prospectus or the short form prospectus.

At any other time, one copy of the documents referred to in subparagraphs (i), (ii) and (iii) above will be provided free of charge upon request to the Secretary.

* * *

APPENDIX “A”

AUDIT COMMITTEE MANDATE

AUTHORITY

The audit committee (the “Committee”) is a standing committee of the board of directors (the “Board”) which has the responsibilities described under the heading “Responsibilities”. The Committee reports to the Board.

The Committee has free access to personnel and documents of the Company and is granted the resources necessary to carry out its duties.

STRUCTURE

1. The Committee is made up of a minimum of three independent directors of the Company, each having financial skills.
2. The mandate of the members is for one year and may be renewed. The members are appointed by the board of directors at the first meeting following the annual meeting of shareholders, or at any other meeting to fill a vacancy.
3. The chairman is appointed by the board of directors for a one-year term, which may be renewed. In the absence or failure of the chairman to sit, the chair is filled by a member chosen by the Committee.
4. The Committee meets at least four times annually to examine the annual and quarterly financial statements of the Company. The Chairman of the Board, the Lead Director, members of the Committee or the external auditors may call special meetings as needed. The Committee determines the place, date and time of its meetings. The meetings may be held by telephone or by any other means allowing the members to communicate with each other.
5. The quorum for meetings of the Committee is a majority of the members and decisions are made by the majority of the votes cast by the members present. Minutes of meetings of the Committee are submitted to and filed with the Board.
6. Minutes of meetings of the Committee are taken by the secretary of the Board (or any other person designated by the Committee) and must give an exact account of the decisions made at the meetings. The minutes of the Committee meetings are presented to and filed with the Board.
7. In addition to the members of the Committee, any other person may be called before the meetings at the request of the chairman of the Committee.
8. The Committee has the power to retain independent legal counsels or other advisors it considers necessary to carry out its mandate and to fix their compensation.
9. The Committee has the power to communicate directly with the internal and external auditors of the Company.
10. The external auditor reports directly to the Committee.

RESPONSIBILITIES

11. Directly supervise the work of the external auditor retained to establish or issue the auditor's report or render other audit, examination or certification services to the Company and resolve disagreements, if any, between management and the external auditor regarding financial reporting.
12. Review the quarterly and annual financial statements of the Company, management's report and press releases respecting the financial results before their public release and recommend its approval to the Board.
13. Review, at least annually, the dividends policy and recommend the approval by the Board of all payments of dividends, if any.
14. Review the content of the management proxy circular, annual information form and annual report of the Company.
15. Review the accounting standards and policies applied by the Company, as modified from time to time during the year, and ensure they are appropriate and in compliance with the applicable legislation.
16. Review, examine and discuss the foreseeable repercussions of the new audit and accounting standards or new securities rules.
17. Study any other issue about which the board of directors should, in the opinion of the external auditors, be informed.
18. Study and evaluate the risk factors inherent to the Company and ensure the development of appropriate measures to manage them effectively.
19. Supervise the application and respect of the environmental policy of the Company and make periodical reports to the Board with respect thereto.
20. Periodically evaluate the presence of the necessary internal control systems of the Company and periodically review the effectiveness of such systems.
21. Periodically evaluate the procedures set up by the Company to communicate the financial information taken or derived from the financial statements of the Company other than the information referred to in paragraph 12 of this mandate and periodically ensure their effectiveness.
22. Establish procedures regarding:
 - i. The receipt, keeping and processing of complaints received by the Company respecting accounting and internal accounting controls or the audit;
 - ii. The confidential and anonymous presentation by employees of the Company of concerns affecting questionable matters relating to accounting or auditing.
23. Recommend to the Board the appointment of external auditors for the upcoming fiscal year and the fees to be paid to them.
24. Annually review and adopt the audit plan prepared by the external auditors, determine whether it meets the needs of the Company and, at least once a year, obtain an official written declaration of the external auditors attesting their independence.

25. Evaluate, at least once a year, the performance of the external auditors.
26. Adopt a policy concerning the prior approval of all services not related to the audit which the external auditors of the Company may render to the Company and its subsidiaries in accordance with applicable legislation.
27. Meet with the auditors in regard to the financial statements and discuss with them their assessment of the control systems in place and their recommendations.
28. The Committee shall periodically meet the internal auditor to ensure the quality of the internal controls of the Company and make the link between the internal auditor and the external auditors of the Company.
29. Review the financial statements of the pension plans of the Company.
30. Examine and approve the hiring policies of the Company with respect to employees and former employees of the present auditor and former auditors of the Company.
31. Carry out any other duty related to the performance of its mandate.
32. Carry out any other mandate which the Board may entrust to it from time to time.
33. Annually assess the accomplishments and performance of the audit committee.
34. Annually review the mandate of the audit committee.
